PROFILE

Software Engineer and full-stack web developer. Passionate about building a top-notch application from start to finish. Detail-oriented and a team player. I enjoy mentoring others and helping grow their knowledge and career

EXPERIENCE

Senior Software Engineer
Fashionphile, January - September 2020
- Lead developer in launching the Salesforce help site
- Understanding of Salseforce systems and community
- Completed daily tasks in Laravel and Javascript to help manage the e-commerce and admin sites
- Worked in a team to complete daily code reviews and service ticket requests
- Helped to delegate service desk tickets

Software Engineer
Clearlink, January 2018 - January 2020
- Product owner and developer of training order entry tool in Laravel and Vue.js
- Managed code reviews and deployment cycle
- Often worked in a mob or peer to peer coding style
- Architected new site features and improvements

Web Developer
Clearlink, April 2015 – January 2018
- Built a Youtube site called Cleartube using WordPress to allow users to watch, share, and like videos
- Managed service desk issues and improvements to Cleartube site using Jira
- Implemented a deployment process to host site with Pantheon
- Designed and developed a commission calculator with a WordPress custom plugin, Javascript, and MySQL that helped agents determine their potential commission amount

Front End Web Developer
Clearlink, July 2013 - March 2015
- Worked with project managers to complete daily tasks
- Increased my knowledge of PHP, Javascript, and MySQL
- Built multiple response web sites
